

Generic, Please.

Get the same medication for less.

Why pay more?

Pay for the medicine, not the brand name. A generic equivalent is a medication that contains the same active ingredients at the same dose and formulation as the brand-name drug. By using generic drugs whenever possible, you can reduce your prescription drug costs while helping to ensure that health care remains affordable for one and all.

Ask your doctor or pharmacist if any of your prescription medications can be filled with a generic alternative.

Save Money With Generic Drugs.
FDA Approved. High Quality. Safe. Effective.
