It's easy to get the care you need

The choice is yours

With HMSA, you can choose your primary care provider (PCP), the doctor at the center of your health care team. You can see your PCP for general and preventive care needs, including health concerns and questions.

If you're happy with your PCP, you don't have to do anything. You can continue to see the doctor you know, trust, and rely on in times of need.

Want to choose or change your PCP? Use Find a Doctor at **hmsa.com/federalplan** to search for a doctor by name, location, or specialty. Just remember to choose your plan before starting your search.

You can also use Find a Doctor to search for other health care providers in HMSA's network.

Get after-hours care

An emergency room visit can be expensive and isn't necessary for minor illnesses and injuries. But where can you go if your doctor's office is closed and you need treatment? You can save money and get the care you need with these after-hours options.

- Connect with a doctor on your computer or mobile device from anywhere in Hawaii with HMSA's Online Care®. Doctors are available 24 hours a day, seven days a week. This benefit is available at no cost to members. Download Online Care from the App Store or Google Play and register or visit **hmsaonlinecare.com**.
- See a doctor at the urgent care clinics in our network, which are listed on page 7. To search for urgent care providers, go to **hmsa.com/urgentcare**.
- See a doctor or nurse practitioner at MinuteClinic, the medical clinic in selected Longs Drugs stores on Oahu. To find a MinuteClinic, use Find a Doctor at **hmsa.com/federalplan** under the Member Resources tab.

Get care around the world

With HMSA, you and your eligible dependents can get care on the Mainland and in many international locations.

How it works

HMSA is part of the Blue Cross Blue Shield network, giving HMSA members access to 2.2 million doctors and hospitals in 200 countries and territories worldwide.

Looking for a doctor or hospital on the Mainland? Go to **bcbs.com**.

GLOBAL CORE

Be prepared

- Before you go, make sure you have your current HMSA membership card with you. Your card will help providers file your claims.
- You can also call 1 (800) 810-BLUE (2583) for the names of participating doctors and hospitals in the area you'll be visiting.

Learn more about our Care Access Assistance Program

If you need to travel to another island for medical treatment, you may be eligible for financial assistance if your care isn't available from a participating provider on your home island or you can't get an appointment soon enough.

Call us at 1 (844) 357-0726 to learn more about this program for more information.

Prescription Drugs

With HMSA, you'll enjoy prescription drug benefits with greater convenience and more savings. $0 copayment with Maintenance Choice

- With the CVS Caremark Maintenance Choice program, Federal Plan members can get 90-day supplies of generic drugs in the mail or from a Longs Drugs (CVS Pharmacy) or Costco Pharmacy with a $0 copayment. That's a saving that can't be beat. To learn more ways to save money on your medications, call 1 (855) 298-2491.

Go online

- To sign up for mail-order prescription drugs, go to My Account on **hmsa.com/federalplan** and click My Account Login.
- On My Account, you can also connect with a pharmacist, print forms, see processed claims, find a nearby pharmacy, and order prescription refills.

Retirement

Medicare is a health insurance program for people age 65 or older. Medicare has different parts that cover specific services.

Medicare's four parts

Part A (Hospital Insurance)	Part B (Medical Insurance)	Part C (Medicare Advantage Plans)	Part D (Medicare Prescription Drug)
			
Helps pay for inpatient care in hospice and hospitals, including critical access and skilled nursing facilities.	Helps pay for doctors' services, outpatient care, and services Part A doesn't pay for.	A health plan that you get through HMSA. You can use this plan in conjunction with your Medicare plan.	A drug plan that's available to people who are eligible for Medicare Part A and Part B. It's not a Federal Employee Health Benefit Drug Plan.

Two cards for more benefits

With HMSA and Medicare you'll receive:

- Access to HMSA's large provider network.
- Access to Medicare's network.
- Coordination of benefits when seeing a provider that accepts both plans.

When you receive care, show providers your HMSA and Medicare membership cards. This ensures your claims are processed correctly.

Finding a provider

Medicare has its own network of participating providers who accept Medicare's allowance. If you visit a provider outside of their network, we'll pay the difference between what Medicare pays and what you owe the provider. You can find out which providers are in the Medicare participating provider network at **medicare.gov**. Go to **medicare.gov** and click Find care providers.

Keep in mind that you may be required to see a participating provider based on your plan type. To find a doctor, use Find a Doctor on **hmsa.com/federalplan**.

For more information about Medicare, visit **medicare.gov**.

Quick reference guide for preventive screenings

Blood pressure check
A blood pressure check is recommended for everyone. A blood pressure plan is recommended for people whose recent blood pressure test was high.

Body mass index
BMI is a number calculated from your weight and height. It's an indicator of body fat and is used to screen for excess weight that may lead to health problems.

Breast cancer screening
A mammogram is recommended for women 40 years of age and older once every calendar year. The test looks for abnormal cells in breast tissue that could lead to cancer.

Cervical cancer screening
These tests are recommended for women ages 21 to 65. There are two tests. A Pap smear looks for abnormal changes in cells in the cervix that could lead to cancer. An HPV test looks for a virus that causes cervical cancer.

Colorectal cancer screening
A colorectal cancer screening is recommended for people ages 45 to 75. This screening looks for abnormal cells and polyps in the colon and rectum that could lead to cancer. Since there are different tests, your doctor can recommend which test is right for you.

Diabetes checkup: Blood sugar test
A blood sugar test is recommended for people with diabetes. High blood sugar can lead to heart attack, stroke, nerve damage, poor circulation, sexual dysfunction, kidney failure, and blindness.

Diabetes checkup: Eye exam
A dilated retinal eye exam (which is different from a regular eye exam) is recommended for people with diabetes. This exam looks for damage to the eye caused by high blood sugar and high blood pressure.

Diabetes checkup: Kidney function test
A kidney function test is recommended for people with diabetes ages 18 to 75. This test looks at your kidneys' ability to filter blood.
